The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid.

The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid.

The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid.

The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid.

The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid. The annual report describes the energy produced by the company during the last year. Solar plants delivered most of the growth, while wind parks stayed stable. The board expects further investments in storage systems and a higher share of renewable energy in the grid.
